Moss Wall Art

Moss Wall Live!

Moss Wall Live! is living wall art that works with the Botanicus Moss Wall Art system. It is designed for indoor use on the wall or on a room divider.

Upcycled Coconut Tree Bark

When the Coconut tree can no longer produce its famous fruit, the tree is harvested and used in building construction and furniture production. The "Coco Bark," has very few uses and is often discarded. We hand-craft the small pieces into beautiful natural panels that fit perfectly into our Moss Wall Art.

Upcycled Mangium Tree Branches and Leaf Burst Mangium Pattern

The Mangium Tree is used primarily in furniture production. Branches are periodically cut from the tree and could easily become waste. We slice and trim the branches into small tiles, then combine the tiles to create a stunning natural mosaic. With our Leaf Burst Mangium Pattern, we arrange the individual leaves to create a stunning burst pattern.

Upcycled Tugbak Tree Branches

When the Tugbak tree is harvested, the branches become waste but we have found a beautiful alternative for them. The branches are sliced into narrow circles and attached in a pattern onto panels to create a natural piece of art that also provides a biophilic experience.

Light Stone Panels

Our Light Stone panels are a combination of natural stone and resin. This allows them to be lighter and easier to install and remove. Prairie Brown and Mountain Grey finishes are natural and beautiful options.

Moss Walls Are Easy to Install And Change

Moss Walls Art from Botanicus

In Architecture, biophilic design is a sustainable design strategy that suggests an instinctive bond between human beings with the natural environment from which we evolved. Our modular Moss Walls are our most recent contribution to this design strategy. Using lightweight, fire-resistant* frames that mount easily on walls, and filling the frames with biophilic, natural materials, Moss Walls allow for an infinite number of design possibilities. Beautiful, sustainable, natural materials are featured. The two part patent pending frames snap on and off, and the frame contents can be changed. Choose from 3 frame* colors and 4 sizes including the Moss Mini squares. Panels choices are 6 moss colors offered in reindeer and sustainably harvested pole moss or long moss. There is an option of including living plants as wall art. The bark panels are in upcycled coconut bark, mangium tree branches, or tugbak tree branches. Light stone panels are available in 2 colors and fit perfectly into our Moss Wall system.

Acoustical Reindeer Moss Panels

Our acoustical moss panels are made from preserved Reindeer moss that grows in Northern European forests. Harvesting is done by hand, with respect for the plant and its surroundings. A specific cutting technique insures the perfect renewing of the plant. The vegetal preservation is completed without the addition of any toxic or dangerous chemicals. A food coloring agent is used to dye the plant using a proprietary method that insures long lasting color stability. Reindeer moss lichen has been used successfully

Lightweight, fire-resistant frames that mount easily on walls. Choose from 4 sizes, 3 frame colors, 5 moss colors, 4 sustainable barks or 2 light stone colors.

Moss Wall Art

for many years in Railroad modeling and architectural models. The preserved moss is 100% biodegradable. The moss is mounted on aluminum panels using non-toxic, A+ rated glue. The natural preservation process allows the finished panels to meet Fire Resistance Standard EN-13501-1 Class B. The moss has high end acoustic attenuation properties, helping to capture over 90% of medium and high voice frequencies.

The reindeer moss wall does not require water, light or maintenance. It adapts to the surrounding humidity like a sponge. Low humidity level will cause the moss to become more brittle and the moss can return to its natural soft and pliable state if the humidity level increases. A clean, grease and dust free environment without excessive air movement is best. Our moss holds its color longer than most due to the special process used for coloring.

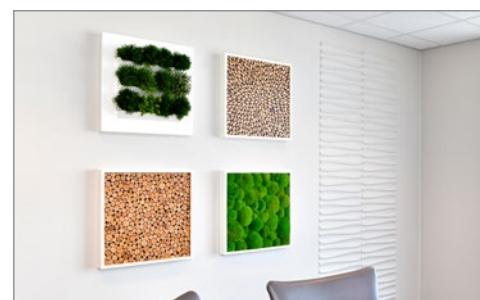

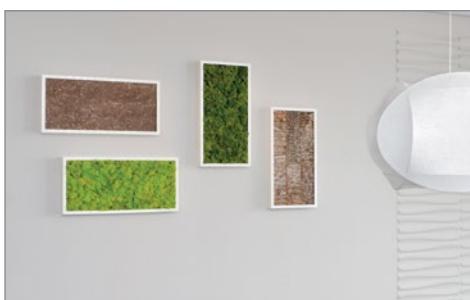

Natural Green Pole Moss

Harvested sustainably by hand in the forests of France, and preserved naturally, our Natural Green Moss present a three dimensional, natural texture in a distinctive, long lasting color.

Deep Green Long Moss

Harvested in a natural, sustainable way in the forests of Turkey and preserved naturally, Long Moss is an elegant, cost-competitive alternative to Flat Moss. Long Moss holds its deep green color very effectively in virtually any interior environment.

*Frames meet UL 94, V-0 flammability standard.

Colors shown on monitors and photographs are not necessarily true. Botanicus.com firmly believes that all customers who order online are aware that colors seen on a monitor will be slightly different as compared to the actual finishes or accessories ordered. All color options offered on Botanicus.com are presented to provide our customers with the maximum available choices. For large orders, Botanicus.com recommends first purchasing a small cylinders with your choice of

color and finish as a sample. Simply type "Sample" into the comment line when ordered. Botanicus.com will then credit you for the cost of the sample item when your final order is completed. Botanicus.com suggests complimenting the colors of your décor rather trying to match colors when purchasing a planter since most décor has different interpretations of individual color.

About Botanicus Interior Landscaping

Since 1971, Botanicus has been a Pioneer in Innovation, Design, Plant Care and best practices of the Interior Landscaping Industry. Founder Kathryn O'Donnell's lifelong support and contributions to the industry earned her induction into the International Plantscape Hall of Fame in 2018. Botanicus' customers benefit from 50 years of experience, knowledge and expertise in retail stores, wholesale greenhouse production, and nursery management. Each year new exciting improvements and innovations transform indoor spaces. The Living Green Wall technology revolution and service practices have allowed many opportunities for beautiful biophilic indoor Green Wall designs. Modular Moss Wall Art panels are now available. Check out our website for inspiration!

Environmental friendly Planters!

Phoenix contains more than 80% post-consumer recycled material; **Rise** comes from recycled plastics; **Epic** uses douglas fir reclaimed wood from old barns; **Salvaged Wood** is made with pine from used pallets and shipping crates. Our Natural Planters — **Light Stone** of stone and resin and **Strong Clay** planters of natural clay composite and fiber backing — are both light weight and watertight. Eco Fiberglass, low fossil fuel commercial grade fiberglass, are light weight, impact resistant and watertight planters come in many styles and sizes from 4" to 50" wide and up to 60" tall. We offer decorative stands, pedestal inserts, casters and self-watering kits. You can trust our 50 years' experience in plant care and interior landscaping to offer beautiful durable planters to complement your house plants, tropical plants, and artificial silk trees, bushes and vines. You will love the form and function of our many shapes to include modern, contemporary, traditional, transitional, Asian, Southwestern, and eclectic styles. Matte, gloss, metallic and gemstone color/finish options will enhance any décor.

Green Up Your Space And Your Mood

Let our passion for biophilic design with plants, planters, living green walls, and moss walls be your guide at www.Botanicus.com.

If you have any questions, feel free to call us at

or send us an email using the form at www.Botanicus.com.

Plantups Green Walls

Our Plantups Green Walls are available in both portable and stationary models with plants on one or both sides! These vertical living walls are easily installed and do not need a pump or electricity or drained to plumbing. Seasonal or replacement plant change outs are fast and easy. The wick tray system provides water for several weeks.

New Moss Walls Art from Botanicus!

In Architecture, biophilic design is a sustainable design strategy that suggests an instinctive bond between human beings with the natural environment from which we evolved. Our modular Moss Walls are our most recent contribution to this design strategy. Using lightweight, fire-resistant* frames that mount easily on walls, and filling the frames with biophilic, natural materials, Moss Walls allow for an infinite number of design possibilities. Beautiful, sustainable, natural materials are featured. The two part patent pending frames snap on and off, and the frame contents can be changed. Choose from 4 sizes and 3 frame colors. Panels are offered in 5 moss colors, including reindeer and sustainably harvested pole moss or long moss. Moss Wall Live! is living wall art. The bark panels are in upcycled coconut bark, mangium tree branches or tugbak tree branches. Light stone panels are available in 2 colors and fit perfectly into our Moss Wall system.

*Frames meet UL 94, V-O flammability standard.

Informative PruneThis YouTube Channel

Our YouTube channel PruneThis is a fun and informative website that informs visitors of all skill levels on the art of pruning, trimming and care tips for your house plants, office plants, tropical plants, outdoor trees and shrubs.
